October 6, 2022

Good Morning,

An online article was published releasing information about the presence of lead in the water of several Delaware schools. To keep everyone informed, the District would like to share the following information:

- The testing was conducted 2 years ago (October 2020) by the Delaware Department of Public Health (DPH).
- Two schools were identified in our District: Smyrna Middle School and JBM Intermediate School.
- Lead was **not** found in the drinking water sources at either school.
- The elevated presence of lead was isolated to one sink in each building.
- DPH provided guidance, which has been followed, and they are returning this month for follow-up testing.
- As with any concern relating to water in our district, we consulted with a water treatment vendor for additional support. We have followed their guidance.

We do not have any present concerns with the water supply in our District.

We will follow up with additional information once it is received.

Thank you,

Roger L. Holt,

Director of Operations
